

Making 10s Exercise Sheet

Part 1: Addition

Example: $11 + 51 + 101$

① Decompose each number into tens and ones

Separating values makes mental math simple

- $11 = 10 + 1$
- $51 = 50 + 1$
- $101 = 100 + 1$

② Group and add all the tens together

Combine the multiples of 10:

$$10 + 50 + 100 = 160$$

③ Group and add all the remaining ones

Combine the ones:

$$1 + 1 + 1 = 3$$

④ Add the totals together

Combine the sum of the tens with the sum of the ones:

$$160 + 3 = 163$$

Practice Questions

1. $11 + 31 + 61 = 10 + 30 + 60 + 3 = 103$

6. $21 + 31 + 41 + 51 =$ _____

2. $21 + 41 + 51 =$ _____

7. $11 + 61 + 91 =$ _____

3. $11 + 21 + 31 + 51 =$ _____

8. $41 + 51 + 61 =$ _____

4. $31 + 51 + 71 =$ _____

9. $11 + 11 + 31 + 41 =$ _____

5. $11 + 41 + 81 =$ _____

10. $21 + 51 + 81 =$ _____

Part 2: Subtraction

Example: $110 - 21 - 31$

① Decompose the numbers to be subtracted

Break the numbers into tens and ones

- $21 = 20 + 1$
- $31 = 30 + 1$

② Subtract the tens

Subtract the multiples of 10 from the starting number (110):

$$110 - 20 - 30 = 60$$

③ Subtract the remaining ones from the result

Take the remaining ones (1 and 1) away from 60:

$$60 - 1 - 1 = 58$$

Practice Questions

1. $120 - 21 - 31 = 120 - 20 - 30 - 1 - 1$
 $= 70 - 1 - 1 = 68$

6. $130 - 31 - 21 - 11 =$ _____
 $=$ _____

2. $100 - 11 - 21 =$ _____
 $=$ _____

7. $160 - 51 - 61 =$ _____
 $=$ _____

3. $150 - 41 - 51 =$ _____
 $=$ _____

8. $140 - 21 - 41 =$ _____
 $=$ _____

4. $180 - 31 - 41 =$ _____
 $=$ _____

9. $200 - 31 - 51 - 61 =$ _____
 $=$ _____

5. $110 - 11 - 51 =$ _____
 $=$ _____

10. $170 - 41 - 31 - 21 =$ _____
 $=$ _____
