

Base-Ten Blocks & Place Value

Addition and Subtraction with Hundreds, Tens, and Ones

Part 1: Representing Numbers with 3D Blocks

Example: Find the total value of the blocks shown below

① Identify Hundreds (Yellow Flats), Tens (Pink Rods), and Ones (Blue Cubes)

② Count each group

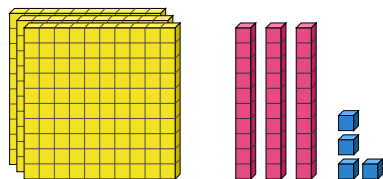

- **Left side:** 6 Hundreds + 5 Tens + 1 One = $600 + 50 + 1 = 651$
- **Right side:** 4 Hundreds + 1 Ten + 7 Ones = $400 + 10 + 7 = 417$

③ Find the total sum

$$651 + 417 = 1068$$

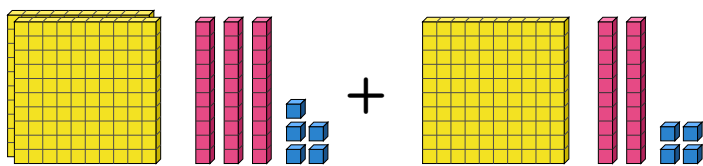

Practice Questions

1. Write the number represented by the blocks below:

_____ Hundreds + _____ Tens + _____ Ones = _____

2. Find the sum of $235 + 124$ using place value blocks:

Total = _____ Hundreds + _____ Tens + _____ Ones = _____

Part 2: Base-10 Subtraction (Taking Away)

Example: Solve $345 - 123$ by crossing out blocks.

① **Build the starting number (345)**

Draw 3 Hundreds Flats, 4 Tens Rods, and 5 Ones Cubes.

② **Take away 123 (1 Flat, 2 Rods, 3 Cubes)**

Cross out the subtracted blocks with red lines:

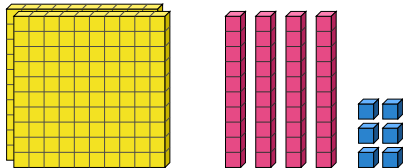

③ **Count remaining blocks**

Remaining = 2 Hundreds, 2 Tens, 2 Ones

$$345 - 123 = \mathbf{222}$$

Practice Questions

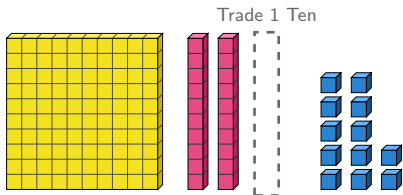

1. **Cross out blocks to calculate** $246 - 114$:

Remaining: _____ Hundreds + _____ Tens + _____ Ones = _____

2. **Regrouping Tens to Ones: Calculate** $132 - 115$

Hint: Trade 1 Pink Ten Rod for 10 Blue Unit Cubes first, then take away 5 ones.

Equation: $132 - 115 =$ _____
